Jeff Janes	https://github.com/JeffJanes2023	Yesterday's work:	Planetary digest, data from a planet, choice of planets	Finished most layout found and setup planetary API	Layout finished; CSS 95% complete; API 100% complete
	Email: jeff308	Today's work:		Fine tuning CSS bit of coding for the interesting facts section	Today I working on the last little bell to the site it is 100% functional and could be turned in as is but just trying to make it a bit better.
	Invited to - https://github.com/Firehawks-Revature				
		Roadblocks:	GitHub and VS Code config	Flex (CSS) is a bit new and need to figure out implementation	Sometimes the javascript errors are a bit nondescript and I have to try and figure them out as well
Nicholas Kroeger	github.com/NRKroeger	Yesterday's work:	Pics cats, petfinder API, specific pages with details	Implemented wireframe, general design of homepage	Finish CSS, setup github directory
	Invited to - https://github.com/Firehawks-Revature	Today's work:		Complete home page, work on api implementation, make alt. pages	Complete API implementation. Use append/remove to reactively change information on page with JS
		Roadblocks:	Not knowing how to use the API	Figuring out API, re-doing finnicky code (box model not functioning as expected)	Uncomfortable with API and certain JS methods
		Comments:			
Parker Van Every	https://github.com/pdvanevery	Yesterday's work:	Movie database, weather database with 7 day forecast	Worked on CSS "Golden" template, styling design	Achieved MVP for application (Successfully API call, data display)
		Today's work:		Implement video game API Complete HTML and JS code	Adding additional features such as more displayed data
	Invited to - https://github.com/Firehawks-Revature	Roadblocks:	Time	Haven't yet settled on API, weather, video game	Indecisiveness and actually understanding what we learned and physically putting it into practice
		Comments:			
Samuel Kuhn	https://github.com/skuhn002	Yesterday's work:	Chemical elements, initial wireframe	I made my first API call to the periodic table API	Created an object for information to share about specific elements + images; Add event listener to element select box
		Today's work:		Today I am going to develop the structure for my HTML pages based off of my wireframing	Flex box style header, footer and main info; Further CSS styling
	Invited to - https://github.com/Firehawks-Revature	Roadblocks:	Not knowing API request	None that I can see at this point	None at the moment
		Comments:			
Taylor Billingsley	https://github.com/SakuraYuna	Yesterday's work:	Abstract, galaxy of cupcakes, agile sdic	Working on API, shows daily NASA photos, pulling an API key Used different API syntax than shared by Ethan	Working on project aesthetics, pulling an additional Futurama API for my second button, working on Syntax
	Invited to - https://github.com/Firehawks-Revature	Today's work:		Implement fully functional APIs and overall website refine	Work on flex box, add another image to the background, try to add additional API
		Roadblocks:	GitHub, Git repo	Need to get the API working with 6 buttons	Adding API to all six buttons
