Samuel Kuhn				P2 use case; interview practice; portfolio phase 3 - still only have 2 roles/responsibilities; challenge 1 for visualforce	Completed second P2 use case; practiced some mock interview questions	Worked on Orders and Products visualforce use case; QC prep; interview prep;	Samuel Kuhn		Made more progress on visualforce use case over the weekend; practiced for QC and interview stuff	Worked on visualforce use case more	VF use case - progress on re-rendering, adding products	Completed VF use case on Orders and Products; first attempt at testing	Ran all but restricted user testing on my trigger use case
	Yesterday's work:	Tried to start Portfolio Phase 3; Did 1 use case	Prepared GitHub for P2; Started second use case	get help on P2 use case; get help on visualforce challenge 1 or recommend another challenge for practice	Work on a visualforce P2 use case; Study some topics that are hard for me (SOQL, SOSL, Visualforce) with Trailhead	work on managing products in an order visualforce page		Try to make more progress on my visualforce use case; continue general studying	More VF use case	VF use case - removing products		primary focus is to get through as much apex testing as possible; also want to do some initial work on the presentation - would like to get some direction from Nick on that	
	Today's work:	Notes; prepare for the week	Interview Prep; P2 work										Error handling and testing VF pages
	Roadblocks:	Portfolio Phase 3 seems to have nothing we can complete before the deadline	Need some clarification on how to coordinate manifest	1) getting stuck on thinking about how to bulkify apex trigger for use case #13 - reject unsimilar email domains; main problem: struggling to keep a SOQL statement out of a loop - getting associated contacts for each triggering contact; 2) challenge 1 Visualforce can't get a URL parameter - do I need to use an experience site for this?	Just a little confused on how use case #20 is referring to pages and apps interchangeably	I'd like to know a little about what to expect for the P01 cert exam; still stuck on trying to rerender after deleting an order - is this a requirement for the use case?				Pricebook entry field on the order item is required but hidden	Got stuck on but figured out updating my list view - came down to requerying records for the list view object	My testing files don't show up in VS Code - not sure if I need some specific file structure - was able to work around this by just doing testing in the Developer console	Still a little confused on an example of something to test on a VF page
	Comments:							Comments:				I would really like to learn how to step through my code using the Developer Console. I think this could drastically speed-up my debugging process - mainly to see the values of variables at different times in execution.	
Taylor Billingsley				Apex Trigger Study, Preparing Visual Studio to Pull & Push Code from Our Org, Analysis of Use Case #15 and #21, and #27	Did some prep work before starting on my Flow use case with Trailhead, VS connected to org and isolated the manifest within comments	Worked on use case #15 (mostly complete); visual force study	Taylor Billingsley		Worked on visualforce pages (80% ready; just need to work out the delete function on their second pages)	Fixed my visualforce delete button, adjusting page redirect with Page Ref instead of outputLink	Uploaded one of the visualforce pages; made adjustments to the other one	Visualforce page ready; just needs testing and some design (fixed the amount of records that show, might add next buttons for each page)	Update the quick action button underneath contacts in order to add the Contact-Type; Maintenance of my visualforce pages
	Yesterday's work:	Studying APEX, Working on Apex Database badges, Salesforce Badges, etc; Completed 2 Use Cases	Apex Trigger Trailhead badges, Salesforce Badges		Work more on the flow for use case #21 and study visualforce pages; review Salesforce content about classes and their methods	Finish up case #15, official start to case #21		Quizzes, Loom videos, study with lightning components	QC; more content, style pages so they're appealing	Going to implement custom method next and previous button for each page		Going to work on LWC content and test code + styling; I want to create a static resource styling sheet for all of our use cases	Testing for pages, completing different use case if possible, working on in-line editing feature
	Today's work:	Quizzes and working more on P2; More Salesforce Content Drilling	QCs (all day); Interview Prep session; More study/Project analysis										
	Roadblocks:	N/A	N/A	N/A	N/A	The custom notification recipient on use case #15, have to assign to system admin		Need to do wireframe?	My VS says no results when I push but most likely a quick fix	Need to adjust one Schema SOObject method I put in my code for security	N/A	N/A	N/A
	Comments:							Comments:				Would like to hear comments about design: can be later	
Nicholas Kroeger	Yesterday's work:	Trailhead, starting P2	Quizzes Loom, trailhead badges, light studying	Studying, QC, Visualforce intro	2 Use cases, PDP interview, visualforce	Wiked towards apex use case, studying, looked through lecture notes	Nicholas Kroeger	Yesterday's work:	Wireframing VF page, Studying for QC/quizzes	Most of Base functionality for VF page, studied for QC	Most of VF page is done, need delete function.	Completed all required non-testing Use cases	Presentation prep, review, etc
	Today's work:	Quizzes 1:1/1 videos, a bit more p2, studying	QC, SOSL studying; P2 use cases	Learn manifest, complete use cases 3+2; interview practice pdp thing	Read through all LN, maybe get to Apex use case	Bug fixing and VF use case		Today's work:	Study for QC, Quizzes, VF page	QC, last minutes studying, finish (?) VF page	Begin to look into testing for apex, finish VF page, portfolio again		Finish testing, bit more review, begin designing slideshow
	Roadblocks:				Airport :(It's okay :(- Taylor	REGEX for use case 2 and read only stuff for use case 12		Roadblocks:	Didn't have enough time to actually start the code for my VF page	N/A		Stuff we learned yesterday a but confusing	bit unclear on running tests
