Samuel Kuhn	Yesterday's work:	Made more progress on visualforce use case over the weekend; practiced for QC and interview stuff
	Today's work:	Try to make more progress on my visualforce use case; continue general studying
	Roadblocks:	2 things I figured out over the weekend that really confused me: 1) in an extension - controller. getRecords is a really useful method; 2) if you are trying to take input that isn't related to an SObject field, you need to use page docType="html-5.0" and an apex:input instead of an apex:inputField

Taylor Billingsley	Yesterday's work:	Worked on visualforce pages (80% ready, just need to work out the delete function on their second pages)
	Today's work:	Quizzes, Loom videos, study with lightning components
	Roadblocks:	Need to do wireframe?
	Comments:	
Nicholas Kroeger	Yesterday's work:	Wireframing VF page, Studying for QC/quizzes
	Today's work:	Study for QC, Quizzes, VF page
	Roadblocks:	Didn't have enough time to actually start the code for my VF page
